BETEX®

INDUCTION HEATERS 12 kVA

For professional use in industry and industrial services

INDUCTION HEATING is a superior, fast and controlled heating method. It is a safe and environmentally-friendly alternative for traditional heating methods such as ovens, oil baths or blow torches. BETEX® induction heaters ensure optimum control during the heating process, automatically regulating the most efficient use of power to ensure a balanced and fast heating.

Even, tension-free heating prevents unnecessary damage and retains original lubrication. Ideal for sealed bearings (2RS-ZZ).

BETEX® TURBO heaters have the additional advantage of a low energy consumption (max. 12 kVA) combined with a high output.
